- Contributing significantly to the development of curricula, lectures and courses, as well as to teaching at university level
- Training of medical specialists and promotion of younger colleagues for a range of professions
- Cooperating with other scientists in research fields represented at the Medical University of Graz, in particular with the institutes of the Diagnostic & Research Center for Molecular BioMedicine, University of Graz and Graz University of Technology (BioTechMed-Graz)
- Supporting the shared use of clinical resources (Radiology und Children's Center) and actively contributing to existing and future interdisciplinary centers

**Successful candidates must have the following qualifications**

- University degree in medicine (degree from an Austrian university or equivalent internationally recognised academic degree as a medical doctor)
- Training as a specialized physician in forensic medicine or an equivalent internationally recognised field of qualification; several years of experience in this field
- Habilitation (*venia docendi*) or equivalent internationally recognised certificate in the relevant field
- Profound competence in forensic morphology
- Several years of experience as a team leader
- Established reputation as an active member of the international academic community
- Several years of experience in teaching at the university level, especially in the field of forensic medicine

- Excellent research and publication record
- Successful record of grant or other third-party funding
- Good knowledge of German (oral and written)

**Additional desirable qualifications:**

- Record of international research stay(s) abroad
- Experience in the field of protection for victims of violence, including children
- Quality management skills
- Demonstrated university didactic skills
- Personnel management skills
- Skills in gender competence and diversity management

**Soft Skills**

- Leadership and shaping skills
- Willingness to cooperate, open-mindedness and ability to work in teams
- Systematic and analytical working practices, excellent organisational skills
- Communication and social skills, ability to resolve conflicts
- Outstanding level of motivation

**Organizational Integration of the Professorship**

You will fill the permanent position of a Full Professor of Forensic Medicine at the Medical University of Graz and are intended to chair the Diagnostic & Research Institute of Forensic Medicine.

Since the institute will move to new premises by 2023 as part of the ongoing construction of the new Med Campus of the Medical University of Graz, your involvement in the planning process is highly welcome.

**Application**

The final salary will be agreed upon during the negotiation process.

(Statutory information: the minimum remuneration is based on the collective agreement (KV § 49.1) that has been signed by all Austrian Universities.)

The Medical University of Graz invites all applicants to submit their application via the online application portal. After submitting your application online, please send a printed and signed copy of all relevant documents to Rector Univ.-Prof. Dr. Hellmut Samonigg, Medical University of Graz, Auenbruggerplatz 2, 8032 Graz, Austria **by no later than April 17, 2019.**

Information about the structural relation between the Diagnostic & Research Institute of Forensic Medicine and the Diagnostic & Research Center for Molecular BioMedicine are available at:
